

Two-Day

DST-SERB sponsored
**Training for research scholars on morphological and
molecular identification of *Culicoides* vectors of
bluetongue virus**

Entomology Research Unit, Department of Zoology, The University of Burdwan is organizing a two-day workshop for research scholars of different colleges, universities and institutions on **02/04/2022** and **03/04/2022** under mandate of DST-SERB sanctioned project (Ref. CRG/2018/004076 dated 30/07/2019).

- ❖ Hands on training on the aspects of field collection of *Culicoides* vectors, basics of identification through microscope using morphological characteristics, extraction of DNA from vectors, PCR amplification of selected gene and agarose gel electrophoresis. Outline of related bioinformatics techniques will also be provided.
- ❖ 10-15 participants will be allowed.
- ❖ Preference will be given to participants working on entomology, veterinary science and allied disciplines.
- ❖ No registration fee required. No TA/DA will be provided to the participants. Registration deadline: March 25th 2022.
- ❖ Google form for participation : <https://forms.gle/QKcVqxzQaniSspcx7>
